[CHED-103] Unify backend and frontend	2h		*
[CHED-104] Update the schema and fix the PUT API	4h		
[CHED-112] Delete confirmation modal for experience	15m		
[CHED-12] Code Cleanup	2h		

Stories on the critical path were completed in the order on the table. By allocating time to complete the earlier stories on the path, the later stories were able to be completed on time with minimal delays. Certain stories were able to be started or laid out even prior to the full completion of the story before them (ex. CHED-107 could be laid out before being connected to CHED-110) Other tasks were able to be worked on independently from those on the critical path.
